How to use these cards

- print on card stock
- glue each blue word card to the back of its matching picture card

For articulation practice:

- help your students articulate each syllable by pointing to the pacing dots beneath each picture
- for phrase/sentence practice, help your students point to the pacing dots as they read the word on the back of the picture card
- say one sentence and help your child repeat the sentence
- note: accented syllables are in dark blue

For learning new sight words:

- use a matrix of three picture cards at one time
- for each picture, teach the name of the picture
- show the small matching word card in blue and place it under the picture
- help your student to match the small matching word card in black under the matching blue word card
- go through the process of matching, selecting, and then reading the word cards
